Education

Northwestern University

Master of Science in Machine Learning and Data Science

Evanston, IL, USA

Sep 2025 – Expected Dec 2026

National Tsing Hua University (NTHU)

Bachelor & Master of Science in Industrial Engineering & Engineering Management

Hsinchu, Taiwan

Sep 2019 – Jun 2024

Technical Skills

- **Machine Learning & AI:** PyTorch, TensorFlow, Scikit-learn, AI agent, LangChain, LangGraph, RAG, NLP, FastAPI, Model Context Protocol, Prompt Engineering, Harness Engineering, Agent Skills, Multi-Agent Orchestration, Reinforcement Learning, Agent Memory & Tool Use, Evaluation Pipelines, Reinforcement Learning, LoRA, Observability, Agent Evaluation
- **MLOps & Cloud:** MLflow, Kubeflow, SageMaker, AWS, Docker, Git, CI/CD Pipelines, Kubernetes, Databricks
- **Programming:** Python, SQL, R, JavaScript, C#, TypeScript

Work Experience

AI Engineer Intern

GoFundMe

Jun 2026 – Aug 2026

San Francisco, CA

- Architected a production-ready conversational AI agent deployment template using FastAPI, LangGraph, and AWS infrastructure, and built a deployment CLI that automated all manual steps for promoting agents across staging and production environments, cutting new-agent bootstrap time from weeks to a few days.
- Decomposed the stack into 5 independently toggleable subsystems (memory, guardrails, PII redaction, MCP, local tools) via typed feature flags, letting users compose any feature combination through config alone instead of rewriting the template
- Pioneered a fine-tuned LLM using AWS custom model for social media share-text generation, targeting an 80% reduction in inference costs, ran Braintrust evaluation experiments to benchmark generation quality against the existing model

AI Engineer Intern

Land Vision

Sep 2025 – May 2026

Chicago, IL

- Architected an automated real estate due diligence agent utilizing LangGraph and MCP tool calling, compressing research turnaround from months to under 1 hour and reducing manual drafting time by 80%
- Engineered an end-to-end agentic pipeline to retrieve and synthesize 20+ heterogeneous data sources, generating highly reliable, citation-backed risk analysis reports for investment analysts
- Optimized multi-agent decision routing by implementing advanced graph data structures within LangGraph workflows, increasing information retrieval accuracy by 92%

Data Analyst Intern

WOOX - Global Crypto Exchange

Jun 2025 – May 2026

Taipei, Taiwan

- Developed an automated NLP pipeline leveraging advanced text similarity algorithms to process regulatory documents across 19 crypto exchanges, cutting manual compliance analysis time by 95%
- Deployed a RAG-powered conversational AI for natural language database querying, slashing response latency from hours to seconds while maintaining a 97%+ validation accuracy
- Created Tableau dashboards to visualize user verification metrics, conducting funnel analysis and cohort analysis to identify operational bottlenecks and trends

Selected Project

Soccer Scout Co-Pilot — Northwestern AI Hackathon (3rd Place Winner) 🏆

Nov 2025

- Architected an end-to-end scouting platform integrating predictive models with locally deployed LLMs fine-tuned via LoRA, automating domain-specific player evaluation reports and reducing analyst workload by over 80%
- Engineered 40+ dynamic temporal and position-specific features, capturing granular player development trends and boosting predictive model accuracy by 22%
- Trained robust XGBoost and LightGBM ensemble models for market value forecasting, achieving an AUC of 0.90 and accurately identifying 70% of breakout targets

Publication

Utilization of Two Types of Feature Datasets with Image-based and Time Series Deep Learning Models in Recognizing Walking Status and Revealing Personal Identification

Oct 2024
